DETAILED ACTION

1. Claim 18 has been added.
2. Claims 18-14 and 17 have been amended.
3. Claims 1-18 are pending.

Response to Arguments

4. Applicant's arguments filed 11 September 2006 have been fully considered and they are persuasive.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 8-14 and 16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 8-14 and 16 lack the necessary physical article or objects to constitute a machine or a manufacture within the meaning of § 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material per se. Claims 8-14 and 16 are directed to a "program storage device for storing a program of instructions". The program storage device is merely a program per se (i.e. functional descriptive material). Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized. Since a computer program is merely a set of instructions capable of being

Art Unit: 2137

executed by a computer, the computer program itself is not a process and USPTO personnel should treat a claim for a computer program, without the computer-readable medium needed to realize the computer program's functionality, as nonstatutory functional descriptive material.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 9,14, and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

9. Claims 9,14, and 16 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: generating a private key needed for decrypting a working key does not disclose the steps necessary for generating a private key, the method for receiving a query and private key is merely data and does not disclose the necessary steps, the method for writing the encrypted data into a database is merely data and does not disclose the necessary steps.

Allowable Subject Matter

10. Claims 1-7, 15, and 17-18 are allowed.
